GUIDELINES FOR COMPETENCY BASED POSTGRADUATE TRAINING PROGRAMME FOR MD IN COMMUNITY MEDICINE

Preamble

The purpose of PG education is to create specialists who would provide high quality health care and advance the cause of science through research & training.

Community Medicine is an academic subject, a branch of Medicine which deals with promotion of health and prevention of diseases, involving people's participation, utilizing professional management skills. The Community Medicine specialist, will inculcate a holistic view of health and medical interventions primarily focused on Community Health/Population Health. Thus, he/she should be equipped with the knowledge, skills, competencies in primary, secondary & tertiary care, control and prevention of outbreaks/epidemics, community diagnosis, health needs assessment, epidemiological assessment, research and planning evidence-based health policies and programmes.

The Guidelines for teaching Community Medicine, therefore, should be designed to create a cadre of professionals who are competent to meaningfully contribute their expertise in planning, implementation, co-ordination, monitoring, evaluation of Primary Health Care Programs based on scientific evidence. The competencies must cover a wide spectrum of skills viz., technical, managerial, administrative, organizational skills, applied skills in Health Information Management, software application and soft skills of communication, motivation, decision-making, team building, training in scientific communication and medical writing.

The purpose of this document is to provide teachers and learners illustrative guidelines to achieve defined outcomes through learning and assessment. This document was prepared by various subject-content specialists. The Reconciliation Board of the Academic Committee has attempted to render uniformity without compromise to purpose and content of the document. Compromise in purity of syntax has been made in order to preserve the purpose and content. This has necessitated retention of "domains of learning" under the heading "competencies".

SUBJECT SPECIFIC OBJECTIVES

1. To create a skilled cadre of medical professionals having expertise in application of principles of Public Health, Community Medicine and applied epidemiology, contributing meaningfully in formulating National Health Policies & Programmes with a systems approach for overall human development.
2. To standardize the teaching & training approaches at post-graduate level, for Community Medicine

REGISTRAR
SRI BALAJI VIDYAPEETH
(Deemed University u/s 3 of UGC ACT, 1956)
Accredited by NAAC with 'A' Grade
NH 45-A, Pillaiyarkuppam, Pondicherry-607 403.

- Paper II:** Nutrition, Environmental Health, Primary Health Care system, Panchayat Raj system, National health Programs, RCH, Demography and Family Welfare, Health Care Administration, Health Management and Public Health Leadership.
- Paper III:** Social & Behavioral sciences- applied aspects, Scientific communications & Medical writing, Research Methodology, Public Health Legislations, International Health & Global Diseases surveillance.
- Paper IV:** Health Policy planning, Medical Education technology, Information Technology, Integration of alternative Health system including AYUSH, Occupational Health, Recent advances in Public Health & Miscellaneous issues, Health Economics.

Practical/Clinical and oral examination:

The practical examination should be conducted over two days, not more than 8 post graduate students per batch, per day as follows :

1. One long Family case from the community:

Socio-economic, **demographic**, cultural and holistic history taking, of the family to understand the various risk factors affecting health and quality of life, assessment of social support system, assessment of present morbidity and its implications, evolve interventions for medical relief and social empowerment and role of family, community and primary health care system in resolving family issues. This shall be conducted preferably in the community setting.

2. One long Case (30 minutes), 2 short cases (20 minutes each) – Cases with Communicable Diseases

Students will elaborate on clinico-epidemiological case history to assess the epidemiological factors, precipitating factors, probable source of infection and evolve measures for diagnosis, treatment, management with reference to the case as well as major public health concerns, i.e. Control, prevention of the diagnosed disease and interventions in case of eminent outbreak / epidemic situations. Short cases may be assessed without presentation of detailed history, beginning with Differential Diagnosis in the given time.

3. Epidemiology and Statistics problem-solving exercises (5):

(Epidemiological – 3, Statistical – 2)

4. Public Health Spots (5) : including interpretation of analytical reports of water, food, environmental assessment and public health micro-biology

5. Viva-voce Examination

Oral/ Viva-Voce Examination shall be comprehensive enough to test the post graduate student's overall knowledge of the subject.

Dear Sir/Madam,

Warm greetings from the Organizing Committee of Integrating Palliative Care in Medical Education & Practice

This program gives an Introduction of Palliative Medicine and the various aspects of palliative care. We are expecting more than 400 health care students and professionals to attend this program from Puducherry and Tamilnadu.

Hospital Palliative Care Team, MGMCRI has been functioning in our Institute since 2016 and MGMCRI is the only medical college in Tamilnadu and Puducherry, authorized to conduct Certificate Course in Palliative Care endorsed by Indian Association of Palliative Care (IAPC).

Sri Balaji Vidyapeeth, the Deemed to be University with its constituent colleges – Mahatma Gandhi Medical College & Research Institute, Shri Sathya Sai Medical College & Research Institute, Indira Gandhi Institute of Dental Sciences and Kasturba Gandhi Nursing College have been in the forefront in making innovations in Health Professions Education. Palliative Medicine has been taught to the undergraduate students in the University along with the regular curriculum. IGIDS have registered copyright for “Credit Based Integrated Module on Palliative Care for undergraduate dental students” and KGNC has been granted the copyright for “Incorporation of palliative care in nursing curriculum – SBV model”

This program is being organized in association with the RMD Pain and Palliative Care Trust and Athulya Assisted Living Private Limited, the leading organizations for palliative care at Chennai Pallium India. Registered Charitable Trust which is in the forefront of palliative care in India is the event sponsor. Cancer relief India and Tamilnadu Palliative Care Society are supporting this endeavor.

solicit your esteemed presence to make the event, a grand success.
