A CERTIFICATE COURSE IN Hospital Infection Control

Q-TEAM

SYLLABUS

Introduction:

Infection is one of the most dreaded adverse events associated with healthcare delivery, accounting for considerable morbidity, mortality and cost. Although sometimes unavoidable, a significant proportion of healthcare associated infections could be prevented by better quality clinical practice. Though all healthcare practitioners are responsible for ensuring consistent delivery of high quality clinically effective care and protect patients from the risk of infection, the support of an "Infection Control Practitioner" can play a vital role in ensuring that all Health Care Workers (HCW) adhere to the correct infection control practices. Thus one can prevent a large number of infections with improved healthcare delivery and patient outcome. In view of the improved quality conscious society and the necessity of NABH accreditation, an Infection Control Nurse (ICN) is a mandatory requirement. HCWs trained as "Infection Control Practitioner" will be able to function effectively in hospitals or any healthcare institutions as far as prevention and control of healthcare associated infections are concerned. During this course all the aspects of HIC will be covered.

Objective:

Aim of the training: Aim: The aim of the course is to train the students of Medical, Dental, Nursing and Allied Health Science students and medical practitioners so as to provide a well supervised expertise in the field of hospital infection control. **Objective:** This program is an endeavor to prepare healthcare professionals for implementation of hospital infection control activities in their day to day practices to prevent hospital acquired infections.

Organization of Training: Course Content: The course consists of 2 Day with 16 Contact Hours which includes theoretical and practical training in the following aspects of hospital infection control:

Background: Historical journey, organization of hospital infection control, journey of antimicrobials, current scenario and challenges in hospital infection control. Immunocompromised host and special scenarios. Candidates will be introduced to the basics of hospital acquired infections (HAI). The available data on the rate, incidence of hospital acquired infections, their common causes, other epidemiological aspects, their influence of patient outcome and financial implications in developing countries like India will be discussed with them. The overview of the course will be given to the candidates. Routes of transmission and their prevention: Various routes of transmission of infection and methods of prevention of infectious diseases in hospital settings. Infection control programme organization: Role of hospital administration in hospital infection control, hospital infection control committee, infection control team, role of ICN, other staff, infection control manual, introduction to surveillance of hospital infection control. Surveillance:

challenges in routine patient care, antimicrobial stewardship, antibiotic policy and its significance in reducing AMR in hospital. Vaccination: Role of vaccination in reducing severe HAI such as Hepatitis B, H1N1 and other hospital acquired infections. Important vaccines in HIC such as Hepatitis B, H1N1, MMR, chickenpox. Blood spill: Management of blood spill with practical demonstration using simulated conditions. Hand hygiene: The role of hand hygiene in hospital acquired infection. Steps of hand washing and related topics will be dealt in detail. Environmental surveillance: Disinfection of OT & ICU and taking surveillance cultures from critical areas, setting up surgical site infection surveillance in hospital.

Assessment of Training: - Exit Examination :- As per the Institutional guidelines The certificate is awarded after a final exit examination, at the end of the 6 weeks training period.

Supervision: Initially, the trainee will be fully supervised by the Faculty posted in the area.

The academic activities of the program in the hospital would include :- Regular academic sessions Bedside practical training Onsite Surveillance Activity To sum up: The goal of the Certificate Course in Hospital Infection Control is to train healthcare workers to undertake infection control practices so as to:

1. Reduce the menace of hospital acquired infections.
2. Reduce associated increased antimicrobial use and consequent resistance.
3. Reduce associated morbidity and mortality
4. Reduce the treatment costs
5. Overall improvement in patient care and their outcomes.

Session on 17th Feb-2020

The audience was welcomed by Dr. Guru Prasath. And the traditional Lamp Lightening ceremony was done by our Dignitaries and one of the participants. Dr.Jeneth Berlin Raj, one of the Core Team members has given a brief Introduction about the Resource person and The Resource person discussed in power point that how Hospital Infections can be controlled and taught many methods to prevent it. The Resource person conducted many interactive games in between the sessions to make the Topic more interesting. After lunch, the session started and the resource person made the topic more interesting by conducting group discussion among the students. The day ended with Tea & Snacks.

Session on 18th Feb-2020

The second session started on the next day and the Resource person conducted some Communication skill competitions among students by grouping them into 4 groups and it was very useful and taught the students about how they are important to their Profession and their day to day life . Many presentations were shown as videos, audios & PowerPoint presentations. The day ended with tea & snacks with vote of thanks.

Summary of the report

(in minimum 150 words, in a prose format for web information, social media and press)

Internal Quality Assurance Cell (IQAC) of Sri Balaji Vidyapeeth has organized a 2-days Program on Value added courses on **Hospital Infection Control**. The objective was to improvise the Hospital infection control among the students for their profession in future. The resource person Dr.Santwana vernekar, the founder of Q-Team ,Mumbai has given a brief explanation about the Hospital infection control skills to be developed by students in profession. The feedback from the participated students indicated that the program was effective and has stimulated interest in them to attend more specific workshops & Programs.
